#### Version Control & Deployment:

Git, GitHub

#### Programming Languages:

Java, JavaScript, TypeScript

## Certifications

Full Stack Developer : Naresh IT [\(View Certificate\)](#)

React JS : Naresh IT [\(View Certificate\)](#)

## Project

### Hospital Management System - Web Frontend

Technologies Used: HTML, CSS, Bootstrap 5

Developed a responsive and user-friendly web-based Hospital Management System that provides an intuitive UI for hospital-related functionalities. Designed interactive pages using HTML, CSS, and bootstrap 5, ensuring a seamless user experience. Making the system visually appealing and easy to navigate.

#### Key Features:

- Designed a structured dashboard and patient management UI.
- Implemented interactive navigation and responsive layouts.
- Enhanced user experience with animations and CSS effects.
- Ensured cross-browser compatibility and mobile responsiveness.
